

## Creative Technology Fills New Singapore Warehouse with ROE Visual's Topaz

**China (August 2024)**— ROE Visual is proud to announce that Creative Technology (CTSG) has substantially invested in ROE Visual's Topaz 1.9 and Topaz-C 1.9 LED panels. The investment marks a significant milestone for CTSG, enabling them to serve them with state-of-the-art event LED technology.

The CTSG team selected the Topaz TP1.9 ED panels because of their small pixel pitch, ensuring crisp, clear images even at close viewing distances. Extending their investment with the Topaz curved LED panel in the same pixel pitch with TheOneCurve™ lock allows CTSG to create creative LED shapes and perfect, smooth-curving LED displays.

The Topaz series is ideal for corporate events, exhibitions, and broadcast environments where detail and color accuracy are paramount.

The recent investment aligns with CTSG's warehouse expansion, which was celebrated as a significant milestone in serving the Asia-Pacific region with CTSG's state-of-the-art event technology services. This strategic move reinforces their commitment to local market demands. Creative Technology has grown significantly, resulting in a global presence.

"The launch of our Singapore warehouse is a testament to our proactive approach in serving the Asia-Pacific region," comments Christopher Burke, Managing Director of Creative Technology Asia Pacific. "By integrating the ROE Visual's Topaz series into our portfolio, we demonstrate our unwavering commitment to innovation and our capacity to lead with visual solutions that shape the future of our industry."

"We would like to congratulate CTSG, who has been a loyal and steadfast partner over the years," says Grace Kuo, Sales Director of ROE Visual. "Their recent investment in our Topaz series underlines our mutual trust and close cooperation. The inauguration of CTSG's new facility is a momentous occasion, commemorating its significant expansion and symbolizing the shared aspirations that continue to guide our journey together."

**About Creative Technology:** Creative Technology (CT) is a leading provider of innovation, technology, project management, and operational support for live events and systems integration markets. Find more: <https://ct-group.com/me/>

### About ROE Visual

Founded in 2006, ROE Visual manufactures unrivaled, award-winning LED display technology for a broad range of applications, including touring productions, broadcast, film, live and virtual events, corporate, architectural, retail, control room, and many more. Used by the most significant touring artists and spectacular broadcast events, retail, and architectural installations, ROE Visual's products live up to the exacting demands of the industry's creatives and technologists. ROE Visual products offer maximal creativity, ease of use, durability, and visual

excellence. By enabling spectacular and breath-taking visual effects to come to life on a large display format, immersive experiences for performers and audiences all over the globe can be created. The company enjoys relationships with leading global AV Installers, rental companies, and notable partners in the production, film, and event industry. ROE Visual offers expert knowledge in LED display technology and extensive support on a global scale through its American, European, and China-based teams.
