

ROE Visual to Showcase Leading LED Solutions at LDI 2024

Chatsworth, USA (November 2024) – ROE Visual will unveil its latest advancements in LED technology at the **Live Design International (LDI)** show, December 8-10, 2024, in Las Vegas. Located at **Booth #2333**, the exhibit will feature an impressive lineup, including the versatile Topaz series, durable Vanish ST outdoor panels, and other favorites from its acclaimed product range.

The **Topaz series**, available in flat, curve, and cube formats, offers unmatched versatility for event organizers and AV rental companies. From immersive stage designs to crystal-clear indoor displays, Topaz sets a new standard for stunning visuals.

For outdoor applications, the **Vanish ST (VST) series** combines exceptional clarity with weather-resistant durability. Its lightweight design and **compatibility with other Vanish products** make it a versatile and reliable choice for large-scale outdoor events. Delivering stunning visuals in any environment, the VST series ensures robust performance without compromising on image quality.

A must-see centerpiece of ROE Visual's exhibit is the artistic **LED Halo Pillar**, nicknamed the "Jellyfish." The "Jellyfish" introduces the Topaz Cube to LDI attendees for the first time, inspiring imaginative possibilities in LED design. The elegant installation features two radiant rows of **Topaz Curve (TP-C)** panels forming a luminous halo, while vertical columns of **Topaz Cube (TP-B)** panels mimic tentacles. The display incorporates 72 curve and 161 cube units, showcasing the creative versatility of the Topaz series.

The ROE Visual booth will showcase a striking main stage display, featuring additional Topaz panels in a bold configuration, enhanced by a Black Marble (BM2) LED floor that perfectly complements the elaborate setup. Anchoring the back of the display is the durable **Carbon 5 MKII**, while immersive hanging sidewall installations highlight **VST, V8T, and Graphite panels**. These **touring favorites**, renowned for their performance on the world's most demanding stages, demonstrate ROE Visual's commitment to excellence.

The booth will showcase seamless integration and advanced processing, powered by four Brompton SX40 processors. As a **proud Diamond Partner of Brompton Technology**, ROE Visual is excited to highlight this collaboration, showcasing the exceptional performance and reliability Brompton brings to its LED solutions.

Visitors are encouraged to experience ROE Visual's LED innovations firsthand, from interactive product displays to live demonstrations. Get ready to connect with our Global team at **Booth #2333**, eager to answer any questions and learn about the exciting projects you're working on. **Use VIP code 10102 for complimentary event access** and see how ROE Visual is setting new standards in live event technology. Don't miss this exclusive opportunity!
