

Are you tired of damaging your valuable but vulnerable switches?

The EOS by ROE Visual is a convenient all-in-one rugged switch for all rental applications that need a reliable switch solution for your HELIOS processors.

Developed by ROE Visual, the EOS offers a rental-ready upgrade of the standard Netgear Switch, adding user-friendly extras, like a read out display, extra connections and waterproof housing. The display offers a handy read-out for fiber connection and active ports. The sturdy metal box has incorporated M10 holes on two sides for easy mounting. The EOS has the functionality to beacon your Switch, ideal when you need to trace the right switch in large set-ups.

Specifications
